#### DESCRIPTION

Factor Certificates enable investors to participate with a leverage effect in the performance of the underlying. The certificates have a constant leverage factor, no knock-out and are open-ended. Long Factor Certificates provide investors with above average profit opportunities in rising markets.

**Please note:** The **leverage effect** of a Factor Certificate means that fluctuations in the value of the underlying have a disproportionate impact on the value of the Factor Certificate. Even small price fluctuations against the investor's market opinion can lead to the loss of a substantial part of the capital invested, up to a **total loss**. If the underlying of the certificate is a future (e.g. in the case of commodities), the **issue of rolling** must be taken into account. Investors are also exposed to the **exchange rate risk** if the currency of the underlying does not equal the currency of the Factor Certificate.

**Factor certificates are not suitable for long-term investment.**

For further information on this product category, please refer to our brochure on Factor Certificates.
