The **MSCI Emerging Markets index** comprises of shares of medium sized to large companies from 27 emerging markets. The index covers approximately 85% of the free float market capitalization of these countries. China, Taiwan, South Korea, India and Brazil are currently the highest weighted countries in the index.

For investors who expect this underlying to perform positively over the upcoming five years, Raiffeisen Centrobank issues the **USD MSCI Emerging Markets Bonus&Growth** certificate. This investment product without capital protection enables investors to participate at 100% without any yield limitation in the positive performance of the MSCI Emerging Markets index at the end of the term. A barrier, set at 54% of the index' starting value, serves as safety mechanism (equals an initial safety buffer of 46%). Provided that the barrier was never violated during the observation period, redemption will be effected at a minimum of 100% of the nominal value – even if the index performance at the end of the term is negative. The certificate has a term of five years. For details on risks and opportunities please see the following pages.

FUNCTIONALITY

At the initial valuation date the **closing price** of the **MSCI Emerging Markets index** is fixed as **starting value** and the **barrier** (54% of the starting value) is determined. At the final valuation date the closing price of the index is compared to the starting value and one of the following scenarios applies:

SCENARIO 1: index performance POSITIVE

The positive index performance is paid out in addition to the nominal value at the end of the term. This applies in any case – irrespective, if the barrier was violated during the term or not.

SCENARIO 2: index performance UNCHANGED or NEGATIVE

In case the MSCI Emerging Markets index **always quoted above** the barrier of 54% of the starting value, redemption is effected at 100% of the nominal value. This means: if the index never declined by 46% or more during the term compared to its starting value, investors obtain the nominal value of USD 1,000 at the maturity date.

Provided that the barrier of 54% of the MSCI Emerging Markets index' starting value was **touched or undercut** at least once during the observation period, redemption at the maturity date is effected according to the index performance (percentage change from the starting value to the closing price at the final valuation date).

OPPORTUNITIES

- Unlimited yield opportunity:

At the end of the term investors participate at 100% and unlimited (no cap) in the positive performance of the underlying MSCI Emerging Markets index.

- Safety buffer:

Partial protection against falling prices down to the barrier of 54% of the starting value – initial safety buffer of 46%

- Flexibility:

Tradability on the secondary market, no management fees

RISKS

- Barrier violation:

If the barrier is violated by the underlying, investors are entirely subject to market risk, without any protective mechanism. Close to the barrier, disproportionate price movements of the certificate can also occur during the term.

- No yield in case of negative index performance:

If the index performance at the end of the term is negative, redemption will be effected at a maximum of 100% of the nominal value.

- Issuer risk / Bail-in:

Certificates are not covered by the Deposit Protection Scheme. Investors are exposed to the risk that Raiffeisen Centrobank AG might be unable to fulfil its payment obligations in respect of the described financial instrument such as in the event of insolvency (issuer risk) or an official directive (Bail-in). A total loss of the capital invested is possible.

DISCLAIMER

In spite of all possible care taken, the data contained in this advertisement are provided purely as non-binding information. This advertisement constitutes neither investment advice nor, an offer nor a recommendation nor an invitation to execute a transaction. The information contained in this advertisement is generic and no consideration is given to the personal circumstances of potential investors. The information contained in this advertisement substitutes neither the necessary individual investment advice for the purchase or sale of investments nor shall any investment decision be taken on the basis of this document. This advertisement has not been prepared in accordance with legal requirements designed to promote the independence of investment research and is not subject to the prohibition on dealing ahead of the dissemination of investment research.

The complete information for all financial instruments described in this advertisement as well as the sole legal basis for potential transactions in one of the described financial instruments is the Base Prospectus (including any possible supplements) which has been approved by the Austrian Financial Market Authority (FMA) in connection with the corresponding Final Terms of the described financial instruments. The approved Base Prospectus (including any possible supplements) and the respective Final Terms have been deposited at the Oesterreichische Kontrollbank AG as the notification office. The approval of the Base Prospectus should not be construed as an endorsement of the financial instrument described herein by the FMA. Additional information on the financial instruments described herein may also be obtained from the respective key information documents (KIDs) that are available for download free of charge on the website of Raiffeisen Centrobank AG (www.rcb.at) by entering the International Securities Identification Number (ISIN) of the respective financial instrument. Unless otherwise explicitly expressed in any of the cited documents above, no measures have been taken in any national legal system which should permit a public offering of the products described therein. Raiffeisen Centrobank AG explicitly excludes any liability in relation to the correctness, appropriateness and completeness of the information presented herein. Certificates are risky instruments of wealth investment. Should the price of the respective underlying instrument of a certificate develop adversely, an investor may lose part or all of his or her invested capital. Certificates react more strongly or weakly to changes of the price of the underlying instrument depending on a number of factors (e.g. volatility or correlation of the underlying instruments, interest, dividends, remaining term, changes in foreign exchange rates) and do not move simultaneously with the underlying. Under certain circumstances the issuer is authorized to redeem the certificates prior to the agreed repayment date.

Issuer Risk/Creditor Participation ("bail-in"): Any payments during or at the end of the term of the certificates depend on the solvency of the issuer ("issuer risk"). Investors are therefore exposed to the risk that Raiffeisen Centrobank AG might be unable to fulfil its payment obligations in respect of the described financial instrument such as in the event of insolvency ("issuer risk") or an official directive ("bail-in"). The resolution authority may also issue such an order before any insolvency proceedings if the issuer is judged to be in crisis. Under these circumstances the resolution authority has wide-ranging powers to take action (so-called "bail-in instruments"). For example, it can reduce the claims of investors in respect of the described financial instruments to zero, terminate the described financial instruments, or convert them into shares of the issuer and suspend investors' rights. More detailed further information is available at www.rcb.at/en/basag. A total loss of the invested capital is possible. Past performance is no reliable indicator of future results. Please refer to the Base Prospectus for additional disclosures on risks as well as further information. The information presented does not constitute binding tax advice. Tax treatment of investments is dependent on the personal situation of the investor and may be subject to change. As regards tax treatment and impact on the investor's individual tax situation, the investor is advised to consult with a tax advisor. This report is based on the knowledge the persons preparing the document have obtained up to the date of creation. Please note that the legal situation may change due to legislative amendments, tax directives, opinions of financial authorities, jurisdiction etc.

The Bonus Certificate's price is subject to several influencing factors and need not develop simultaneously to and in accordance with the underlying's performance. Such influencing factors include e.g. intensity of the underlying's price fluctuations (volatility), bond interest rates, solvency of the issuer or remaining term. If the Bonus Certificate is sold prior to the end of the term, there is the risk to incur a partial or even total loss of the invested capital. Dividends and similar rights associated with the underlying are taken into account when structuring the Bonus Certificate and are not paid out.
