Within a period of 10 (ten) business days before the maturity of the respective mentioned future contract according to the terms of the contract of the relevant price fixing entity (see column "Price Fixing Entity" in the excerpt of the offering), the mentioned future contract can – in the issuer's absolute and sole discretion – be replaced by the future contract with the best liquidity, whereby the terms and conditions of the replaced future contract shall correspond to the terms and conditions of the replacing future contract (meaning the "actual future contract"), except the due date of maturity ("Roll-Over").</li> <li>b.) |                         |  | 4. The weighting of the soft commodities contained in the baskets changes during the term of the certificates corresponding to the performance of the official settlement prices of the several commodities, whereas the number of units of the respective commodity always remains constantly. (i.e. when the settlement price of one commodity rises more than the price of another commodity, then the weighting for the former commodity arises accordingly.   |
|                         |  | 5. If during the term of the certificates no official settlement price is determined and published for the respective commodity or, if in the opinion of the issuer, there is a market disruption, the issuer will take such measures in order to reinstate the original economic situation of the holder of the certificates. If a commodity is irrevocably cancelled from trading at the relevant price fixing entity, this commodity will be deleted from the basket. The value of this commodity will be averaged to the commodities remaining in the basket in accordance with their respective actual weighting. The situation of the holder of the certificates may not be deteriorated by these adjustments. The decision of the issuer or third party authorized by him concerning such adjustments of the basket is binding for all parties involved unless there is an obvious mistake and will be published. |
