Subscr. period <sup>1</sup>	Oct 02 - Nov 06, 2015
Initial valuation date	Nov 09, 2015
Issue value date	Nov 10, 2015
Final valuation date	Nov 08, 2022
Maturity date	Nov 10, 2022
Capital protection	100% at the matur. date
Starting value	Closing price of the index at the initial valuation date
Redemption	Provided that the closing price of the underlying Euro Stoxx® Select Dividend 30 index quotes at the same level or above the starting value, or above 25% of the starting value at the final valuation date, investors obtain 125% or 150% respectively, otherwise: 100% (redeemed at the maturity date by Raiffeisen Centrobank AG*).
Listing	Vienna, Frankfurt, Stuttgart
Quotes	www.rcb.at

\* Raiffeisen Centrobank AG is a 100% owned subsidiary of Raiffeisen Bank International AG – rating of RBI: [www.rbinternational.com/ir/ratings](http://www.rbinternational.com/ir/ratings)

<sup>1</sup> Early closing or extension of the subscription period is within the sole discretion of Raiffeisen Centrobank AG.

The turbulences at the Chinese stock exchanges and the uncertainty about the interest rate decision of the FED caused a high level of nervousness on the global markets in summer 2015. This shows that also in times of low interest rates and low commodity prices taking the right investment decisions requires particular experience and sensitivity. High-dividend stocks of the euro zone enjoy great popularity among analysts and experienced investors in such market conditions. These stocks have traditionally a lower volatility, as companies are primarily engaged in sustainable and profitable businesses.

Investors who expect the European stock markets to post a moderate performance and who wish at the same time to be 100% capital protected, may **generate 25%** return provided that the EURO STOXX® Select Dividend 30 quotes at or above the starting value at the end of the term. **The yield increases to 50%** in case the index records a rise by 25% or more. Taking the issue surcharge of 3% during the subscription period into account, the return over the total term comes up to 45.63% (equal to 5.52% p.a.) or 21.36% (equal to 2.8% p.a.), respectively. Declines on the European stock market during the term have **no impact** on the payout at the end of the term. The certificate has a term of seven years.

### FUNCTIONALITY

- At the initial valuation date the **starting value** (closing price of the EURO STOXX® Select Dividend 30) is determined.
- At the final valuation date the closing price of the index is compared to the starting value and **one of the subsequent scenarios will occur**:

#### SCENARIO 1: Index unchanged or ABOVE the starting value

##### A) EURO STOXX® Select Dividend 30 index +25% or more compared to the starting value → 50% yield + 100% nominal value

In case the closing price of the index quotes at 25% or more above the starting value at the final valuation date, redemption at the maturity date is effected at 150%. This is equivalent to EUR 1,500 per EUR 1,000 nominal value and at the same time represents the maximum amount (maximum payout).

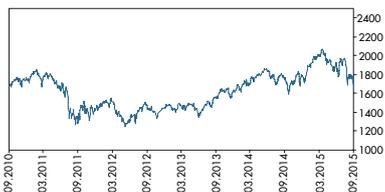

##### B) EURO STOXX® Select Dividend 30 index between ±0 and less than +25% compared to the starting value → 25% yield + 100% nominal value

In this case redemption is effected at 125%, equivalent to EUR 1,250 per EUR 1,000 nominal value.

#### SCENARIO 2: Index BELOW the starting value

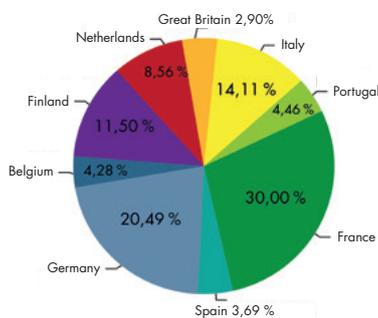

If the EURO STOXX® Select Dividend 30 quotes below its starting value at the final valuation date, the capital guarantee applies and the certificate is redeemed at 100% of the nominal value at the maturity date. This is equivalent to EUR 1,000.

### YOUR INVESTMENT HORIZON

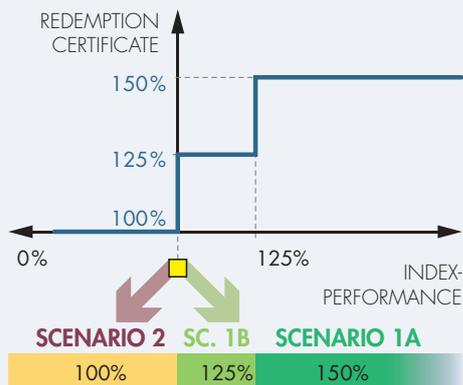

### NOTE

The mentioned opportunities and risks display a selection of the most important facts regarding the product.

For further information see the prospectus – approved by the Austrian Financial Market Authority, deposited at the Oesterreichische Kontrollbank AG and published on our web site [www.rcb.at/SecuritiesProspectus](http://www.rcb.at/SecuritiesProspectus)

### Payout profile

The index performance during the term does not affect the payout at the end of the term. It is exclusively the closing price of the index at the final valuation date that is compared with the starting value.

At the end of the term the investment is 100% capital guaranteed by Raiffeisen Centrobank, i.e. during the term price fluctuations may occur, at the end of the term the investor obtains at any rate 100% nominal value.

### Underlying: EURO STOXX® Select Dividend 30

The index mirrors the performance of high-dividend yielding stocks in the Eurozone. These stocks with above-average profit participation are usually less volatile than the overall market and, from a long-term perspective, they post a better performance. The index includes stocks from all important industrial sectors of the following countries of the Eurozone: Belgium, Finland, France, Germany, Great Britain, Italy, the Netherlands, Portugal and Spain. The index includes for example:

- Allianz
- AXA
- Munich Re
- Eni
- BASF
- Orange
- Total
- Banco Santander
- Siemens
- Daimler
- Unilever
- Deutsche Post

### OPPORTUNITIES

- The Guarantee Certificate Europe Dividend Stocks Bond 2 is 100% capital guaranteed at the end of the term, i.e. at the end of the term (November 2022) the investor obtains at least the nominal value.
- Price declines of the index during the term do not affect the payout at the end of the term.
- Even in sideways moving and slightly increasing European stock markets investors can generate a solid yield.
- Flexibility through permanent secondary market, no management fees.

### RISKS

- In case the index performance of the EURO STOXX® Select Dividend 30 is negative, the investor obtains no yield and is paid out the nominal value.
- The Guarantee Certificate Europe Dividend Stocks Bond 2 does not yield ongoing income such as interest rate.
- During the term the price of the certificate may drop below 100%, the capital guarantee takes effect exclusively at the end of the term.
- Redemption is dependent on the solvency of Raiffeisen Centrobank (issuer risk). In case of insolvency of the issuer the investor may incur a total loss.

During the term the market price of the certificate may drop below 100% of the issue price due to price fluctuations. The capital guarantee of 100% nominal value exclusively applies to the maturity date. The market price of the certificate needs not develop simultaneously to the market price of the underlying during the term. During the term the market price of the certificate is subject to various influencing factors such as volatility, coupon rate, credit rating of the issuer and time to maturity date. Redemption or repayment of the certificate at maturity is dependent on the solvency of the issuer. Further information – see Prospectus.
