The decline in stock prices in 2016 put the global markets under significant pressure. Economic concerns in the emerging markets, especially in China and the continuation of the drop in oil prices increased uncertainty among investors. Price corrections of 10% or more were seen in some large, well-known indices. However, after the turbulent start of the year the international markets seem to calm down again.

Such corrections can indicate attractive opportunities for investors to enter the market. With the **Dividend Stocks Winner II 98%** RCB offers a certificate providing an opportunity for risk averse investors who believe in a recovery of the international stock markets and who want to participate in its development. The investment product with 98% capital protection offers a participation of 125% in the positive average performance of a renowned dividend index. Further details regarding opportunities and risks are presented on the following page.

The **STOXX® Global Select Dividend 100 Index (EUR)** serves as underlying for the certificate. The index focuses on the highest dividend-yielding stocks of North America, Europe and Asia/Oceania. These stocks with above-average profit participation are usually less volatile and more stable than the overall market. Criteria for the selection of the stocks included in the index are the continuous growth of dividend yield and the regular payment of dividends.

At the end of the term the investment is 98% capital protected by Raiffeisen Centrobank, i.e. during the term price fluctuations may occur but at the end of the term the investor obtains 98% of the nominal value.

### FUNCTIONALITY

At the initial valuation date the **starting value** of the STOXX® Global Select Dividend 100 Index (EUR) is determined (closing price of the index). Once a year, at the respective annual valuation date (2017–2023), the closing price of the index is compared with its starting value and the **index performance** is calculated (percentage index performance from the starting value to the closing price at the respective valuation date). At the end of the term the arithmetic average performance of the STOXX® Global Select Dividend 100 Index (EUR) of the seven annual valuation dates is determined.

At the maturity date 125% of the **positive average performance** is paid out **in addition to the capital protection of 98%** of the nominal value.

## NOTE

The mentioned opportunities and risks display a summary of the most important facts regarding the product.

For further information see the prospectus (including possible changes and additions) – approved by the Austrian Financial Market Authority, deposited at the Oesterreichische Kontrollbank AG and published on:

[www.rcb.at/securitiesprospectus](http://www.rcb.at/securitiesprospectus)

Product brochure as of: Jan 28, 2016

At the final valuation date one of the following scenarios will occur:

### SCENARIO 1: Average index performance is POSITIVE

The positive average performance is paid out with a **participation factor of 125%** in addition to the capital protection of EUR 980. The redemption amount is **unlimited**.

### SCENARIO 2: Average index performance remains UNCHANGED or is NEGATIVE

In case the average index performance of the seven annual valuation dates is not positive, the **capital protection** applies and the certificate is redeemed at 98% of the nominal value at the maturity date. This is equivalent to EUR 980.

### EXAMPLES: redemption = capital protection + 125% of positive Ø performance

MARKET	CAP. PROTECTION	PARTICIPATION	Ø INDEX PERF.	REDEMPTION
<b>POSITIVE</b>	98%	125%	+60%	EUR 1,730.00
<b>SIDWAYS</b>	98%	125%	+5%	EUR 1,042.50
<b>NEGATIVE</b>	98%	125%	-25%	EUR 980.00

## STOXX® Global Select Dividend 100 Index (EUR)

- Since 1999 the index has been calculated as price index by the renowned Swiss index house Stoxx Limited.
- The index is composed of **100 companies** from North America (40 stocks), Europe (30 stocks) and Asia & Oceania (30 stocks)
- Annual revision of the composition in March
- Shares included in the index are for example:**

Allianz, AT&T, Banco Santander, ConocoPhillips, Deutsche Post, GlaxoSmithKline, Intel, Kimberly-Clark, Mattel, Merck, Münchener Rück, Orange, Swisscom, Zurich

## OPPORTUNITIES

- Unlimited participation in the positive average performance of a global index consisting of 100 companies.
- The average price calculation provides for a cushion to set off price slumps by positive performances at other valuation dates.
- The investment product is 98% capital protected at the end of the term, i.e. at the end of the term (September 2023) the investor obtains at least 98% of the nominal value.
- Flexibility through permanent secondary market, no management fees.

## RISKS

- In case the average performance of the STOXX® Global Select Dividend 100 Index (EUR) of the seven annual valuation dates is not positive, the investor obtains no yield and is paid out 98% of the nominal value. Thus the investor will incur a loss of 2% of the nominal value as the capital protection comes up to only 98%.
- The Certificate Dividend Stocks Winner II 98% does not yield ongoing income such as interest rates.
- During the term the price of the certificate may drop below 98%; the capital protection takes effect exclusively at the end of the term.
- Redemption is dependent on the solvency of Raiffeisen Centrobank (issuer risk). In case of insolvency of the issuer the investor may incur a total loss.

The index is used under license from STOXX. The certificates based on the index are in no way sponsored, endorsed, sold or promoted by STOXX and/or its licensors and neither STOXX nor its licensors shall have any liability with respect thereto.

During the term the price of the certificate may drop below the capital protection level of 98% of the issue price due to price fluctuations. The capital protection of 98% of the nominal value exclusively applies to the maturity date. The market price of the certificate need not develop simultaneously to the market price of the underlying during the term. During the term the market price of the certificate is subject to various influencing factors such as volatility, coupon rate, credit rating of the issuer and time to maturity date. Redemption or repayment of the certificate at maturity is dependent on the solvency of the issuer. Further information – see Prospectus.
