After the rally we have seen in recent years, many investors fear that the stock market is slowly reaching a tipping point. Especially growing political uncertainties such as the trade war between China and the US could rattle markets in the near future. Nevertheless, as long as macro-economic indicators remain positive so does the general outlook for the global stock market.

For security-oriented investors who expect moderately rising prices of the EURO STOXX® Select Dividend 30 index, the **Europe Dividend Stocks Bond 4** represents a suitable investment opportunity. Besides the capital protection of 100%, the certificate offers the possibility to generate a yield of 32% of the nominal value at the end of the term (this equals 3.53% p.a.). The certificate has a term of 8 years. For details on risks and opportunities please see the following pages.

FUNCTIONALITY

At the initial valuation date the starting value (closing price of the underlying index) is determined. At the end of the term the starting value is compared to the closing price at the final valuation date. If the EURO STOXX® Select Dividend 30 index quotes at or above the starting value, redemption is effected at 132% of the nominal value. In case of a negative index performance the capital protection of 100% applies. At the final valuation date one of the following scenarios applies:

SCENARIO 1: Index quotes AT/ABOVE the starting value at the end of the term

Investors obtain EUR 1,320 per nominal value if the EURO STOXX® Select Dividend 30 index quotes at or above the starting value at the end of the term. This amount represents the maximum payout.

SCENARIO 2: Index quotes BELOW the starting value at the end of the term

In case of a negative index performance, the capital protection of 100% applies at the end of the term. This means that redemption is effected at 100% of the nominal value, which equals EUR 1,000 per nominal value.

The **100% capital protection** by Raiffeisen Centrobank only applies at maturity, i.e. during the term the certificate price may drop below 100%, but at the end of the term the investor obtains 100% of the nominal value in the worst case.
