Acting ethically, ecologically and socially responsibly has developed into an important criterion also with regards to taking investment decisions within recent years. Pioneers in this field are amongst others also the Austrian Bishops' Conference and the religious communities in Austria, which have defined guidelines for ethical investments at an early stage. These guidelines, among other things, entail that no investments are to be made into companies whose business activities include weapon production, animal testing, gambling, tobacco, genetic engineering or nuclear energy. In order to invest along the ethical values of Christian social teaching, Raiffeisen Centrobank in cooperation with the renowned index provider STOXX Ltd. developed the iSTOXX® Global Ethical Select 30 Index. This index is built upon the above mentioned criteria.

This index acts as the underlying for the new capital protection certificate **Ethics Winner 90%**, which enables investors to participate 1:1 in the positive performance of the iSTOXX® Global Ethical Select 30 Index up to the cap of 140% of the starting value. This means the maximum payout at the end of the term is limited to 140% of the nominal value. In case of a negative index performance of more than -10% of the nominal value, the capital protection of 90% applies at the end of the term. The certificate has a term of 8 years. For details on risks and opportunities please see the following pages.

### FUNCTIONALITY

#### Beginning of the term:

At the initial valuation date the **closing price** of the iSTOXX® Global Ethical Select 30 index is determined as starting value and the cap (140% of the starting value) is fixed.

#### End of the term:

At the end of the term, the performance of the iSTOXX® Global Ethical Select 30 index is evaluated. The index starting value is compared to the index closing price at the final valuation date. Investors participate at 100% in the performance of the underlying index up to the cap of 140% of the starting value. Thus, the maximum payout is limited to EUR 1,400 per nominal value. In case of a negative performance of the iSTOXX Global Ethical Select 30 index of more than 10%, the capital protection of 90% applies.

The **90% capital protection** by Raiffeisen Centrobank only applies at the end of maturity, i.e. during the term the certificate price may drop below 90%, but at the end of the term the investor obtains 90% of the nominal value in the worst case.

The price of the Certificate is dependent on the underlying's price. Adverse performances of the underlying may cause price fluctuations of the Certificate during the term. If the Certificate is sold prior to the end of the term, there is the risk to incur a substantial loss of the invested capital (market risk). The capital protection of 90% of the nominal value applies solely at the end of the term. During the term, the price of the Capital Protection Certificate may drop below the agreed capital protection amount. During the term, the Capital Protection Certificate's price is subject to several influencing factors and need not develop simultaneously to and in accordance with the underlying's performance. Such influencing factors include e.g. intensity of the underlying's price fluctuations (volatility), interest rates, solvency of the issuer or remaining term. If the Certificate is sold prior to the end of the term, there is the risk to incur a partial loss of the invested capital. The Capital Protection Certificate's final terms may provide for a maximum payout. If the underlying is not quoted in the same currency as the Capital Protection Certificate and if the Certificate is not currency hedged, the foreign exchange rate influences the Capital Protection Certificate's price during the term (currency risk). Dividends and similar rights associated with the underlying are taken into account when structuring the Certificate and are not paid out.

Issuer Risk/Creditor Participation ("bail-in"): Any payments for structured securities during the term or at the end of the term depend on the solvency of the issuer (issuer risk). Investors are exposed to the risk that Raiffeisen Centrobank AG as an issuer might be unable to fulfil its obligations in respect of the described financial instruments, such as in the event of insolvency (inability to pay/over-indebtedness) or a legal order to initiate resolution measures. The resolution authority may also issue such an order before any insolvency proceedings if the issuer is judged to be in crisis. Under these circumstances the resolution authority has wide-ranging powers to take action (so-called "bail-in instruments"). For example, it can reduce the claims of investors in respect of the described financial instruments to zero, terminate the described financial instruments, or convert them into shares of the issuer and suspend investors' rights. A total loss of the capital invested is possible. More detailed information is available at [www.rcb.at/en/basag](http://www.rcb.at/en/basag). Under certain circumstances, the issuer has the right to redeem the certificate prior to the maturity date. A total loss of the capital invested is possible.
