The certificate **Europe/USA Bonus&Safety** is based on two reknown stock indices. The European stock benchmark **EURO STOXX 50®** and the US American index **S&P 500®** serve as underlyings for this certificate. This investment product is suited for investors who expect these two indices to perform stably in the upcoming five years and who deem price slumps of 51% or more unlikely to occur.

The certificate **Europe/USA Bonus&Safety** combines the opportunity to obtain a bonus yield of 20% at the end of the term (equals 3.7% p.a.) with partial protection for the invested capital. The initial distance to the barrier (safety buffer) is 51% and the certificate has a term of five years. Further details regarding opportunities and risks of this certificate are presented on the following page.

### FUNCTIONALITY

At the initial valuation date the **closing price** of the **EURO STOXX 50® index** and the closing price of the **S&P 500® index** are fixed as **starting values** and the respective **barrier** (49% of the starting value) as well as the respective **bonus level** (120% of the starting value) are determined. During the observation period the price of each index is continuously compared to the barrier: as long as neither of the two underlying indices ever loses 51% or more compared to their respective starting value, the **bonus mechanism** remains activated and the bonus amount is paid out at the maturity date.

At the final valuation date one of the following scenarios will apply:

#### SCENARIO 1: both indices always quoted ABOVE their respective barrier

If the EURO STOXX 50® index **AND** the S&P 500® index always quoted above the barrier of 49% of their respective starting value during the observation period, the certificate is redeemed at 120%. This means, provided that none of the two indices ever declines by 51% or more compared to its starting value, investors obtain EUR 1,200 per nominal value at the maturity date. This amount also represents the cap (= maximum payout amount).

#### SCENARIO 2: barrier TOUCHED or UNDERCUT by at least one index

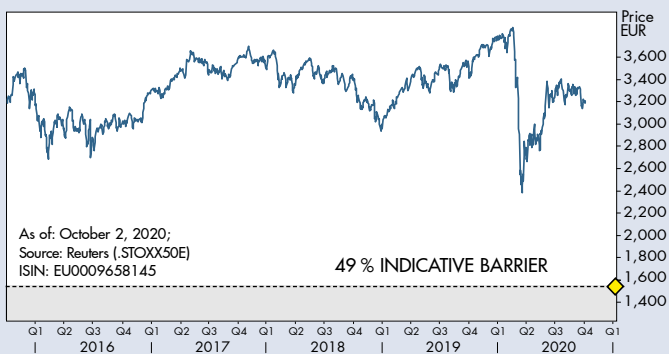

If the EURO STOXX 50® index **AND/OR** the S&P 500® index touched or undercut the barrier of 49% of the respective starting value during the observation period, the bonus mechanism is suspended. Redemption at the maturity date is effected according to the index which performs "worst" (percentage change from the starting value to the closing price at the final valuation date). Even if the bonus mechanism is suspended, the maximum payout is limited to EUR 1,200 per nominal value and investors do not participate in price increases of the indices beyond the cap.

The Bonus Certificate's price is subject to several influencing factors and need not develop simultaneously to and in accordance with the underlying's performance. Such influencing factors include e.g. intensity of the underlying's price fluctuations (volatility), bond interest rates, solvency of the issuer or remaining term. If the Bonus Certificate is sold prior to the end of the term, there is the risk to incur a partial or even total loss of the invested capital (price performance). Dividends and similar rights associated with the underlying are taken into account when structuring the Bonus Certificate and are not paid out.

Structured securities are risky instruments of wealth investment. Should the price of the respective underlying instrument of a certificate develop adversely, an investor may lose part or all of his or her invested capital. Structured securities react more strongly or weakly to changes of the price of the underlying instrument depending on a number of factors (e.g. volatility or correlation of the underlying instruments, interest, dividends, remaining term, changes in foreign exchange rates) and do not move simultaneously with the underlying.

Issuer Risk/Creditor Participation ("bail-in"): Any payments for structured securities during the term or at the end of the term depend on the solvency of the issuer (issuer risk). Investors are exposed to the risk that Raiffeisen Centrobank AG as an issuer might be unable to fulfil its obligations in respect of the described financial instruments, such as in the event of insolvency (inability to pay/over-indebtedness) or a legal order to initiate resolution measures. The resolution authority may also issue such an order before any insolvency proceedings if the issuer is judged to be in crisis. Under these circumstances the resolution authority has wide-ranging powers to take action (so-called "bail-in instruments"). For example, it can reduce the claims of investors in respect of the described financial instruments to zero, terminate the described financial instruments, or convert them into shares of the issuer and suspend investors' rights. A total loss of the capital invested is possible. More detailed information is available at [www.rcb.at/en/basag](http://www.rcb.at/en/basag). Under certain circumstances, the issuer has the right to redeem the certificate prior to the maturity date. A total loss of the capital invested is possible.
