Investors who expect at least a stable development of the world economy in the next five years have an opportunity to invest with an attractive annual return and a 40% safety buffer with the Bonus Certificate Global Stocks 200%

The underlying asset is the MSCI® World Top ESG Select 4.5% Decrement Index, which composes of stocks that meet predefined ESG criteria and is therefore in line with the principles of sustainable investment.

MSCI® World Top ESG Select 4.5% Decrement Index, which includes leading ESG stocks such as MICROSOFT, NVIDIA, NOVO NORDISK, HOME DEPOT, ADOBE

This certificate offers a 160% payout opportunity at the maturity as well as partial protection of the Nominal value due to the Barrier. The term of the certificate is five years. Please refer to the next page for the opportunities and risks.

FUNCTIONALITY

At the Initial valuation date the Starting value of the underlying is fixed and from that the Barrier is determined. During the observation period the underlying price is compared with the Barrier. On the final valuation date one of the following scenarios will apply:

1. Underlying quotes ABOVE the Barrier at the end of the term

a) The closing value of the underlying index on the Final valuation date is below the Bonus Amount and above the Barrier:

On the Maturity Date, 120% of the Nominal value (equivalent to CZK 1,200 per certificate) will be paid.

b) The closing value of the underlying index on the Final valuation date is above the Bonus Amount:

On the Maturity date, the Bonus Amount + participation in the positive performance of the underlying index (percentage change from the Starting value to the Final value) above the Bonus Level will be paid at a ratio of 2:1, up to Cap. This means that the maximum possible redemption at the Maturity date is limited to 160% of the Nominal value of the certificate (equivalent to CZK 1,600 per Certificate).

2. Barrier is touched or undercut by underlying index at the end of the term

If the underlying quotes at or below its Barrier, redemption on the Maturity date will be affected according to the performance of the MSCI® World Top ESG Select 4.5% Decrement Index (percentage performance from the Starting value to the Final value).

Consideration of major adverse impacts on sustainability (PAI):

OPPORTUNITIES

Bonus yield

Opportunity to obtain a bonus yield of 20% in 5 years, as well the opportunity to participate 2:1 in the positive price performance of the underlying index at the end of the term up to Cap.

Safety buffer:

Partial protection against declining prices due to the initial safety buffer of 40% - Barrier at 60% of the Starting value

• Flexibility:

Tradability on the secondary market, no management fees

RISKS

Barrier violation:

In case of Barrier violation, investors are entirely subject to market risk, without any protective mechanism. Close to the Barrier, disproportionate price movements of the certificate can occur.

Limited yield opportunity:

The maximum possible yield is limited by the Cap value and a payout of 160% of the Nominal value of the certificate. The investor does not participate in the growth of the underlying indices above the Cap value.

Issuer risk / Bail-in:

Certificates are not covered by the Deposit Protection Scheme. Investors are exposed to the risk that Raiffeisen Bank International AG might be unable to fulfill its payment obligations in respect of the described financial instrument such as in the event of insolvency (issuer risk) or an official directive (Bail-in). A total loss of the capital invested is possible.

Raiffeisen Bank International AG explicitly excludes any liability in relation to the correctness, appropriateness and completeness of the information presented herein. Certificates are risky instruments of wealth investment. Should the price of the respective underlying instrument of a certificate develop adversely, an investor may lose part or all of his or her invested capital. Certificates react more strongly or weakly to changes of the price of the underlying instrument depending on a number of factors (e.g. volatility or correlation of the underlying instruments interest, dividends, remaining term, changes in foreign exchange rates) and do not move simultaneously with the underlying. Under certain circumstances the issuer is authorized to redeem the certificates prior to the agreed repayment date.

Issuer Risk/Creditor Participation ("bail-in"): Any payments during or at the end of the term of the certificates depend on the solvency of the issuer ("issuer risk"). Investors are therefore exposed to the risk that Raiffeiser Bank International AG might be unable to fulfil its payment obligations in respect of the described financial instrument such as in the event of insolvency ("issuer risk") or an official directive ("bail-in"). The resolution authority may also issue such an order before any insolvency proceedings if the issuer is judged to be in crisis. Under these circumstances the resolution authority has wide-ranging powers to take action (so-called "bail-in instruments"). For example, it can reduce the claims of investors in respect of the described financial instru-ments to zero, terminate the described financial instruments, or convert them into shares of the issuer and suspend investors' rights. More detailed further information is available at raiffeisenzertifikate.at/en/basag. A total loss of the invested capital is possible. Past performance is no reliable indicator of future results. Please refer to the Base Prospectus for additional disclosures on risks as well as further information.

As regards tax treatment and impact on the investor's individual tax situation, the investor is advised to consult with a tax advisor. This report is based on the knowledge the persons preparing the document have obtained up to the date of creation. Please note that

the legal situation may change due to legislative amendments, tax directives, opinions of financial authorities, jurisdiction etc

The Bonus Certificate's price is subject to several influencing factors and need not develop simultaneously to and in accordance with the underlying's performance. Such influencing factors include e.g. intensity of the underlying's price fluctuations (volatility), bond interest rates, solvency of the issuer or remaining term. If the Bonus Certificate s sold prior to the end of the term, there is the risk to incur a partial or even total loss of the invested capital. Dividends and similar rights associated with the underlying are taken into account when structuring the Bonus Certificate and are not paid out.
