FUNCTIONALITY

- At the initial valuation date the **starting value** (closing price of the STOXX® Europe ESG Leaders Select 30 index) is determined.
- At the final valuation date the closing price of the index is compared to the starting value and **one of the following scenarios will apply**:

SCENARIO 1: Index UNCHANGED or ABOVE the starting value

A) Index $\geq +21\%$ → 42% yield + 100% nominal value

If the closing price of the index quotes 21% or more above the starting value at the final valuation date, redemption at the maturity date is effected at 142% of the nominal value. This is equivalent to EUR 1,420 per EUR 1,000 nominal value and represents the maximum payout.

B) Index $\geq 0\%$ and $< +21\%$ → 21% yield + 100% nominal value

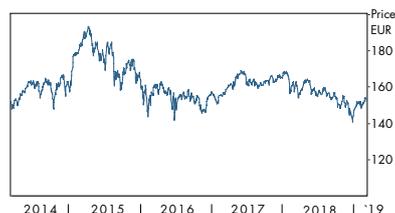

If the closing price of the index quotes at or less than 21% above the starting value at the final valuation date, redemption at the maturity date is effected at 121% of the nominal value. This is equivalent to EUR 1,210 per EUR 1,000 nominal value.

SCENARIO 2: Index BELOW the starting value

If the index quotes below its starting value at the final valuation date, the capital protection applies and the certificate is redeemed at 100% of the nominal value at the maturity date.

The **100% capital protection** by Raiffeisen Centrobank only applies at maturity, i.e. during the term the certificate price may drop below 100%, but at the end of the term the investor obtains 100% of the nominal value in the worst case.
