YIELD OPPORTUNITY WITH SAFETY MECHANISM

In short:

With the Europe/Austria Bonus&Safety 4 certificate of Raiffeisen Centrobank investors obtain a bonus yield of 20% at the end of the term, provided that neither the EURO STOXX 50® index nor the ATX® index ever decline by 51% or more in relation to their respective starting value during the observation period. If the barrier is violated, the investor is entirely subject to market risk.

FUNCTIONALITY

At the initial valuation date, the **closing price of the EURO STOXX 50®** index and the **ATX®** index are fixed as **starting values** and the respective **barriers** (49% of the respective starting value) as well as the **bonus levels** (120 % of the respective starting value) are determined. The prices of both indices are continuously compared with the respective barrier during the observation period. At the final valuation date one of the following scenarios will apply:

SCENARIO 1: Both indices always quoted ABOVE the respective barrier

If both the EURO STOXX 50® index **AND** the ATX® index always quoted above the barrier of 49% of their respective starting value during the observation period, the certificate is redeemed at 120% of the nominal value. This means, provided that none of the two indices ever decline by 51% or more compared to its starting value, investors obtain EUR 1,200 per nominal value at the maturity date. Due to the cap, this amount represents the maximum payout.

SCENARIO 2: Barrier TOUCHED or UNDERCUT by at least one index

If the EURO STOXX 50® index **AND/OR** the ATX® index touched or undercut the barrier of 49% of the respective starting value during the observation period, redemption at the maturity date is effected according to the performance of the index that performed worst (percentage change from the starting value to the closing price at the final valuation date). Even if the barrier has been touched or undercut, the maximum payout remains limited at EUR 1,200 per nominal value and investors do not participate in price increases of the underlyings beyond the bonus level/cap.

NOTE

The referenced opportunities and risks represent a selection of the most important facts regarding the product.

You are about to purchase a product that is not easy and difficult to understand.

For further information see the Base Prospectus (including possible amendments) – approved by the Austrian Financial Market Authority (FMA), deposited at the Oesterreichische Kontrollbank AG and published at www.rcb.at/en/securitiesprospectus (we recommend reading the prospectus before making an investment decision), in the key information document and among „Customer Information and Regulatory Issues“ at www.rcb.at/en/customerinformation

OPPORTUNITIES

Attractive bonus yield:

Opportunity to obtain 20% yield in sideways moving and even in moderately declining markets

Safety buffer:

Partial protection against falling prices due to the initial safety buffer of 51% – barrier at 49% of the respective index starting value

Flexibility:

Tradability on the secondary market, no management fees

RISKS

Barrier violation:

If the respective barrier is violated by at least one of the two underlyings, investors are entirely subject to market risk, without any protective mechanism.

Limited yield opportunity:

The opportunity to generate yields is in any case limited by the bonus level/cap, therefore the maximum yield amounts to 20% in five years (equals 3.71% p.a.) based on the issue price of 100%.

Issuer risk / Bail-in:

Certificates are not covered by the Deposit Protection Scheme. Investors are exposed to the risk that Raiffeisen Centrobank AG might be unable to fulfill its payment obligations in respect to the described financial instrument such as in the event of insolvency (issuer risk) or an official directive (Bail-in). A total loss of the capital invested is possible.

DISCLAIMER

In spite of all possible care taken, the data contained in this advertisement are provided purely as non-binding information. This advertisement constitutes neither investment advice nor, an offer nor a recommendation nor an invitation to execute a transaction. The information contained in this advertisement is generic and no consideration is given to the personal circumstances of potential investors. The information contained in this advertisement substitutes neither the necessary individual investment advice for the purchase or sale of investments nor shall any investment decision be taken on the basis of this document. This advertisement has not been prepared in accordance with legal requirements designed to promote the independence of investment research and is not subject to the prohibition on dealing ahead of the dissemination of investment research.

The complete information for all financial instruments described in this advertisement as well as the sole legal basis for potential investors in one of the described financial instruments is the Base Prospectus (including any possible supplements) which has been approved by the Austrian Financial Market Authority (FMA) in connection with the corresponding Final Terms of the described financial instruments. The approved Base Prospectus (including any possible supplements) and the respective Final Terms have been deposited at the Oesterreichische Kontrollbank AG as the notification office. The approval of the Base Prospectus should not be construed as an endorsement of the financial instrument described herein by the FMA. Additional information on the financial instruments described herein may also be obtained from the respective key information documents (KIDs) that are available for download free of charge on the website of Raiffeisen Centrobank AG (www.rcb.at) by entering the International Securities Identification Number (ISIN) of the respective financial instrument. Unless otherwise explicitly expressed in any of the cited documents above, no measures have been taken in any national legal system which should permit a public offering of the products described therein. Raiffeisen Centrobank AG explicitly excludes any liability in relation to the correctness, appropriateness and completeness of the information presented herein. Certificates are risky instruments of wealth investment. Should the price of the respective underlying instrument of a certificate develop adversely, an investor may lose part or all of his or her invested capital. Certificates react more strongly or weakly to changes of the price of the underlying instrument depending on a number of factors (e.g. volatility or correlation of the underlying instruments, interest, dividends, remaining term, changes in foreign exchange rates) and do not move simultaneously with the underlying. Under certain circumstances the issuer is authorized to redeem the certificates prior to the agreed repayment date.

Issuer Risk/Creditor Participation ("bail-in"): Any payments during or at the end of the term of the certificates depend on the solvency of the issuer ("issuer risk"). Investors are therefore exposed to the risk that Raiffeisen Centrobank AG might be unable to fulfil its payment obligations in respect of the described financial instrument such as in the event of insolvency ("issuer risk") or an official directive ("bail-in"). The resolution authority may also issue such an order before any insolvency proceedings if the issuer is judged to be in crisis. Under these circumstances the resolution authority has wide-ranging powers to take action (so-called "bail-in instruments"). For example, it can reduce the claims of investors in respect of the described financial instruments to zero, terminate the described financial instruments, or convert them into shares of the issuer and suspend investors' rights. More detailed further information is available at www.rcb.at/en/basag. A total loss of the invested capital is possible. Past performance is no reliable indicator of future results. Please refer to the Base Prospectus for additional disclosures on risks as well as further information. The information presented does not constitute binding tax advice. Tax treatment of investments is dependent on the personal situation of the investor and may be subject to change. As regards tax treatment and impact on the investor's individual tax situation, the investor is advised to consult with a tax advisor. This report is based on the knowledge the persons preparing the document have obtained up to the date of creation. Please note that the legal situation may change due to legislative amendments, tax directives, opinions of financial authorities, jurisdiction etc.

The Bonus Certificate's price is subject to several influencing factors and need not develop simultaneously to and in accordance with the underlying's performance. Such influencing factors include e.g. intensity of the underlying's price fluctuations (volatility), bond interest rates, solvency of the issuer or remaining term. If the Bonus Certificate is sold prior to the end of the term, there is the risk to incur a partial or even total loss of the invested capital. Dividends and similar rights associated with the underlying are taken into account when structuring the Bonus Certificate and are not paid out.
