DESCRIPTION

With the certificate **USD Amazon Twin Win**, investors participate at the end of the term (August 2023) in the positive performance of the Amazon share up to the cap of 140% of the starting value. As long as the stock never loses 40% or more of its starting value, even a negative performance is converted 1: 1 into a profit. In the event of a barrier breach by the underlying stock, investors will be exposed one-to-one to market risk due to physical delivery of the share. In this case, a substantial loss of capital is possible.
