Information on the term

The Certificate

Please note:

- 95% of the nominal amount will in any case be paid out at maturity; during the term, the price may fall below the issue price or the capital protection level.
- The maximum repayment is limited to 130% (of the nominal amount).
- Loss of purchasing power due to inflation is not offset by the capital protection.

Issuer risk / creditor participation: Certificates are not covered by the deposit protection system. There is a risk that Raiffeisen Bank International AG may not be able to meet its payment obligations due to insolvency (issuer risk) or any official orders ("bail-in"). In such cases, the invested capital may be lost in full.

Notes:

You are about to purchase a product that is not easy and difficult to understand. For further information see the Base Prospectus (including possible amendments) – approved by the Austrian Financial Market Authority (FMA), deposited at the Oesterreichische Kontrollbank AG and published at <u>raiffeisenzertifikate.at/en/securitiesprospectus</u> (we recommend reading the prospectus before making an investment decision), in the key information document and among "Customer Information and Regulatory Issues" at <u>https://www.raiffeisenzertifikate.at/en/customer-information</u>. The approval of the base prospectus by the competent authorities is not to be understood as an endorsement of the product by these authorities.

Disclaimer

This advertisement serves exclusively as non-binding information, for whose correctness, topicality and completeness no guarantee is assumed by the creator. The information contained herein does not constitute an offer and is neither recommendations nor financial analyses. They are not a substitute for investor and investment-oriented advice on buying and selling the financial instrument.

The base prospectus (and any supplements) of the financial instrument, as well as the respective basic information sheet (KID), can be downloaded from the website of Raiffeisen Bank International AG (RBI) raiffeisenzertifikate.at/en/securities-prospectus/. The approval of the base prospectus does not constitute an endorsement of this financial instrument by the competent authorities (CSSF, FMA). You are about to acquire a product that is not easy and may be difficult to understand. Please read the prospectus before making an investment decision. Issuer Risk/Creditor Participation ("bail-in"): Any payments during or at the end of the term of the certificates depend on the solvency of the issuer ("issuer risk"). Investors are therefore exposed to the risk that Raiffeisen Bank International AG might be unable to fulfil its payment obligations in respect of the described financial instrument such as in the event of insolvency ("issuer risk") or an official directive ("bail-in"). The resolution authority may also issue such an order before any insolvency proceedings if the issuer is judged to be in crisis. Under these circumstances the resolution authority has wide-ranging powers to take action (so-called "bail-in instruments"). For example, it can reduce the claims of investors in respect of the described financial instruments to zero, terminate the described financial instruments, or convert them into shares of the issuer and suspend investors' rights. More detailed further information is available at raiffeisenzertifikate.at/en/basag. A total loss of the invested capital is possible.

The information presented does not constitute binding tax advice. Tax treatment of investments is dependent on the personal situation of the investor and may be subject to change.

The price of the Capital Protection Certificate is dependent on the underlying's price. Adverse performances of the underlying may cause price fluctuations of the Certificate during the term. If the Capital Protection Certificate is sold prior to the end of the term, there is the risk to incur a substantial loss of the invested capital ("market risk"). The capital protection of 95% of the nominal value applies solely at the end of the term. During the term, the price of the Capital Protection Certificate may drop below the agreed capital protection amount. During the term, the Capital Protection Certificate's price is subject to several influencing factors and needs not develop simultaneously to and in accordance with the underlying's performance. Such influencing factors include e.g. intensity of the underlying's price fluctuations (volatility), interest rates, solvency of the issuer or remaining term. If the Capital Protection Certificate is sold prior to the end of the term, there is the risk to incur a partial loss of the invested capital. Dividends and similar rights associated with the underlying are taken into account when structuring the Capital Protection Certificate and are not paid out.
